# 📄 Storyboard Content - Kofi Foster 2403233

## 1. Target Audience & Purpose

- Target Audience: University tutors, lecturers, potential employers, and peers.
- Purpose: To demonstrate fundamental web development skills (HTML5, CSS3, responsive design) while presenting a professional personal portfolio for CIT2011 Individual Assignment #1.

**2. Site Map (Navigation Flow)**

The site features a global navigation bar present across all four pages:

- Root Folder: 2403233_IA1_SIAY27
    - Home Page: index.html (Bio, ID Picture, Hobbies, Quick Links)
    - Professional Page: professional.html (Resume, Skills, Education, Lab Activities)
    - Personality Page: personality.html (Traits, Hero/Mentor, LLM Essay)
    - Personal Development Page: development.html (Book Reflections & Internal Bookmarks)

### 3. Layout Wireframe & Structure

All four pages follow a unified semantic HTML structure:

| |
|---|
| HEADER SECTION: Student Name & Page Title |
| NAVIGATION BAR: Home |
| MAIN CONTENT AREA:<br><br>• Section 1: Page Details / Profile Picture<br><br>• Section 2: Coursework / Essay / Book Reflections<br><br>• Section 3: Data Tables / Lists / Bookmark Links |
| Footer Section: GitHUB Repository Link & Copyright Information |

### 4. Color Palette & Typography

- Primary Color: Deep Navy (#1d3557) - Headers and navigation bar.
- Accent Color: Muted Blue (#457b9d) - Links and hover states.
- Background Color: Light Neutral (#f8f9fa) - Page background for legibility.
- Text Color: Charcoal (#212529) - High contrast body text.
- Typography: Clean sans-serif font stack (Arial, Helvetica, sans-serif).

### 5. Usability & Accessibility Features

- High text-to-background color contrast for readability.
- Descriptive alt attributes on images for screen readers (e.g., student ID photograph).
- Clear, descriptive link labels and bookmark jump anchors for quick navigation.

### 6. Responsive Layout Strategy

- Flexible layout rules using max-widths (100%) on media elements.
- Responsive CSS design ensuring the navigation bar and main sections stack cleanly on mobile screen widths without horizontal scrolling.
